PROFILE

I am Excited To work with a company who appreciates innovation so that I can enhance my knowledge and skills to give my best for the growth of the company.

WORK EXPERIENCE

Junior Developer

Posimyth Innnovation   8 Months(September 2023 to May 2024)

- Developed and maintained product-based applications using modern web technologies.
- Created widgets in JavaScript and utilized React for designing user interfaces and components.
- Collaborated with cross-functional teams including designers, product managers, and senior developers to deliver high-quality software solutions.
- Worked on WordPress projects, integrating custom widgets and features to enhance functionality and user experience.

PROJECTS

1. **Dynamic Post Management with React(Simple Task)**

- Description: Designed and implemented a dynamic post management system using React, incorporating CSS Modules, Bootstrap for styling. Developed a Home Tab to display a post list and a CreatePost Tab for submitting new posts. Utilized React components, hooks, and context API for state management. Implemented Fetch API for retrieving and submitting post data, ensuring newly created posts dynamically update the Home Tab.

- **"Simple Todo App using React Hooks and Context API"**

- Developed a simple Todo application using React, leveraging hooks and the Context API for state management. Implemented a component-based architecture to enhance code reusability and maintainability, allowing users to add and delete tasks efficiently. Utilized local storage to persist data across sessions.
